Northwestern Michigan College has created a new degree program in Biomedical Technology. This degree is a high-level edge of the high-tech industry, and it is designed to help you succeed in the biomedical field.

Biomedical technology is a growing area of focus, and for a number of years, we have been offering a degree in Biomedical Technology. This degree is designed to help you succeed in the biomedical industry, and it is designed to help you succeed in the biomedical industry.

## Areas of Emphasis:

- Electronics
- Medical Technology
- Emerging Technologies
- Biomedical Equipment

## Why study Engineering Technology—Biomedical?

It is estimated that there will be a high demand for the biomedical field in the future. More than 5,000 new jobs are expected to be added by 2028. During the year, about 3,500 students are expected to graduate in this field, and the health care industry is expected to grow by 30% over the next 20 years. As a result, there will be a high demand for the biomedical field.

According to the Bureau of Labor Statistics, the biomedical technology degree is a growing field, and it is expected to be one of the fastest growing fields in the future. In this field, you will be able to work in a variety of settings, and you will be able to work in a variety of settings.
